Musterstadt, July 6, 2026

Example: Form B – application preset

DRAFT — Do not send. Contains placeholders or test data.

Greeting

What this guide shows

Choose `application-en` for a personal header, green accents, and the prepared application attachment set within the Form B geometry. Draft mode is switched on separately in this preview, making its warning banner and editing markers visible.

TODO: Replace with a task.

[Insert final text]

NOTE: Check text and attachments.

Use `content.tex` to review the recipient, subject, links, and attachments; the actual document text belongs inside `LetterBody`. Sender details remain in `data/sender-data.tex`. Turn draft mode off before export. This is an oriented layout guide, not a DIN certification.
