Example: Form B – business preset

Greeting

What this guide shows

The visual hierarchy of `business-en` comes from four parts: an image header, contact details beside the address, a company footer on page one, and unobtrusive black links. The shared logo setting controls the image; `data/sender-data.tex` supplies the contact and footer information. Continuation pages switch to the compact follow-up layout.

Start in `content.tex` with the Form B selection, recipient, and subject, then place the written content in `LetterBody`. Replace every fictional demo value before use. The result follows the toolkit’s Form B orientation without claiming DIN certification.
