Example: Form B – minimal preset

Greeting

What this guide shows

When the additional panels would be unnecessary, `minimal-en` keeps the Form B page deliberately quiet. A black monogram remains, while decorative color blocks and the automatic attachment list stay out of view.

Set the recipient and subject in `content.tex`; add the short correspondence inside `LetterBody`. Sender information continues to come from `data/sender-data.tex`. If unchanged demo data remains, the toolkit prints a compiler-log reminder before final use, not a visible warning in the PDF. The preset offers a DIN 5008 Form B oriented starting point without a certification claim.
